

# Chameleon PRO

## Security Made Easy for the Whole Company

The Chameleon manages data security for organizations with full AES-256 encryption. Chameleon PRO Master Key manages multiple PRO User keys. Plug in the Chameleon to access your files. Unplug it to secure them.

## Applications:

- Safely transfer and store sensitive data, such as bank account information, driver license numbers, social security numbers, employee records, customer/patient information.
- Encrypt internal or external drives (Hard drive or USB drive).
- Encrypt files, folder and E-mail attachments.
- Safely store data to cloud storage.

For more applications, please visit our website at [www.lucidport.com/chameleon](http://www.lucidport.com/chameleon)

## Advanced Features

### Administrative Control

IT administrators manage Chameleon PRO User devices for the entire organization through a Chameleon PRO Master key.

### PC Lock

When enabled on a Chameleon device, PC Lock automatically locks the Windows session whenever the device is removed.

### AutoLogin

When enabled on a Chameleon device, log-in to Windows simply by plugging in the Chameleon device.

## Chameleon vs. Chameleon PRO

|                              | Chameleon | Chameleon Pro Master | Chameleon Pro User |
|------------------------------|-----------|----------------------|--------------------|
| Encrypted Drives             | ✓         | ✓                    | ✓                  |
| Individually Encrypted Files | ✓         | ✓                    | ✓                  |
| Password Required for Use    | Optional  | Required             | Managed            |
| PC Lock                      |           | ✓                    | Managed            |
| AutoLogin                    |           |                      | Managed            |
| Program/Manage Users         |           | ✓                    |                    |
| Access Users' Data           |           | ✓                    |                    |
