LucidPort's L800 Device Controller Receives Wireless USB Certification from USB-IF

Mountain View, CA – August 21, 2007 – LucidPort Technology's L800 device controller chip is now certified by the USB-IF as a silicon building block for Certified Wireless USB peripherals. The L800 and its development kit, the L800WUSB-RDK, are available now.

The L800 is a general purpose device controller for adding wireless USB functionality to peripheral designs. It supports all compliant packet sizes, burst sizes, transfer sizes, and number of endpoints. It manages all the functions required by the WiMedia UWB and Certified Wireless USB protocols, including beaconing, encryption, and association. This makes the L800 ideal for use in printers, scanners, digital camcorders, media players, and other peripherals.

Harnessing WiMedia UWB technology, the L800 interoperates with other wireless USB products at transfer speeds reaching up to 480 Mbps. "As a peripheral, the L800 works with all Certified Wireless USB Hosts while coordinating traffic with other Certified Wireless USB Peripherals" said Reid Augustin, VP of Product Development at LucidPort. "A wireless device should just work – the user should not worry about interference or incompatibility with other devices."

Pricing and Availability

Both the L800 and its development kit (L800WUSB-RDK) are available now. The L800 comes in a lead free 108-ball BGA package (11x11mm, 0.8mm pitch). The L800 is priced at \$4.98 for 400,000 quantities. The L800WUSB-RDK is available for \$1,500 (quantity 1).

About LucidPort Technology, Inc.

LucidPort Technology, Inc. is a fabless semiconductor company developing Certified Wireless USB controllers powered by Ultra Wide Band (UWB) technology. LucidPort's controllers add wireless functionality to peripherals like printers, scanners, cable modems, TV tuners, external hard drives, and many other peripherals and consumer devices. LucidPort's technologies apply advanced hardware with integrated software to create flexible, high performance, and easy to use

wireless products. LucidPort is headquartered at 335 Pioneer Way, Mountain View, CA 94041, 650-968-6800, www.lucidport.com
